Weight:	15 kg	Load weight: 40 kg from bottom (30 kg from top)
Travel:	maximum 680 mm	Build-in height: minimum 570 mm depending on the size of the screen
Travel time:	12 seconds for 680 mm travel	Dimensions: H: 570/1250 mm W: 170 mm D: 215mm
Accessories:	Supplied in the package: adapter plate for flat screens in VESA standards up to 300 x 200 mm, slider cap to fix onto the upper finishing plate, velcro	
Optional:	wireless control (infrared or HF) Weibel large-screen-adapter plate	

Features

- Takes all flat screens **from 33" (84cm) to 40" (102cm) diagonal measurement**. 42" (107cm) plasma flat screens can only be raised fully if the screen frame is not too high.
- The upper and lower final lift travel positions are programmed by us to your measurements. There is a programming device if you need to make modifications (as an extra device).
- To prevent possible jamming, the lift is operated by an up/down button. The button must be held while the lift is travelling up or down.
